SUMMARY

Web developer with 8 years of experience

SKILLS

Technical Skills

React · Vue · Next.js · TypeScript · JavaScript · Ethers.js · Web3.js · Architecture · Node.js · Express.js · NestJS · REST · GraphQL · Swagger · Microservices · Auth · Context · Redux · Zustand · RxJS · ReactQuery · Axios · Design

Other Skills

Git · Docker · Postman · Vercel · AWS · CI/CD · Actions · Deploy · Figma · Jira · Framer · Lottie · Photoshop · Workflow · Strapi · Contentful · Sanity · WordPress · Headless

EMPLOYMENT HISTORY

Founder & Full-Stack Developer

01/2026 — Present

Yoona Space

Technologies: Architecture, React, Next.js, TypeScript, Node.js, Supabase, PostgreSQL, Docker, Prisma, Zustand, Styled Components, REST API, JWT, CI/CD, GitHub Actions, Stripe, LemonSqueezy, Vercel

- Designed and built Yoona Space from scratch, defining the product architecture and delivering the complete SaaS platform independently.
- Developed Yoona Charts, an embeddable analytics platform with an Open API and iframe integration, allowing clients to integrate interactive dashboards into existing products.
- Developed Yoona Leaderboards, implementing automated ranking pipelines and real-time leaderboard updates through REST APIs and Telegram integrations.
- Built a Telegram-based automation system for marketing campaigns, including reminders, polls, point distribution, spam detection, and community engagement workflows.
- Designed and implemented the complete integration layer, including authentication, Open APIs, iframe embedding, data synchronization, and custom client integrations.
- Integrated subscription billing with Stripe, LemonSqueezy, Apple Pay, and Google Pay, enabling commercial SaaS distribution.
- Managed infrastructure, deployments, CI/CD pipelines, and production releases while supporting 6 active clients and processing data for more than +3,000 users.

Frontend Developer

06/2023 — 06/2026

Claimr.io

Technologies: React.js, TypeScript, Zustand, styled-components, React Router, Node.js, Ethers.js, Web3, Vue.js, GitHub Actions

- Designed the frontend architecture for multiple production applications, introducing centralized state management with Zustand and a reusable UI layer based on styled-components.
- Developed reusable components and internal UI libraries, including a drag-and-drop engine powering Kanban-based workflows while keeping presentation separated from business logic.
- Integrated external APIs and internal Node.js services, implementing authentication, asynchronous data synchronization, and error handling.
-

Implemented blockchain functionality using Ethers.js and Web3 technologies, enabling smart contract interactions and wallet-based features.

- Adapted frontend solutions for clients using different frameworks and technology stacks, simplifying product integration and customization.
- Participated in architecture discussions, feature implementation, code reviews, and continuous improvement of shared frontend infrastructure.

Frontend Developer

09/2022 – 04/2023

Getwin

Technologies: React.js, TypeScript, Styled Components, Context API, Redux, REST API, Sass

- Developed new product functionality using React.js and TypeScript for customer-facing web applications.
- Built reusable UI components and application modules, improving consistency and maintainability across the project.
- Implemented client-side business logic and managed application state using React Context API.
- Collaborated with designers and backend developers to deliver new features and improve user experience.
- Maintained and optimized existing frontend codebase, fixing issues and improving application stability.

Frontend Developer

08/2021 – 09/2022

Graviti

Technologies: React.js, TypeScript, Node.js, Styled Components, Context API, Redux, REST API

- Developed responsive web applications using React.js, TypeScript, and Styled Components.
- Implemented reusable UI components and integrated new business features into existing products.
- Worked with REST APIs and participated in backend-related development using Node.js.
- Improved existing interfaces, fixed production issues, and optimized application performance.
- Collaborated with cross-functional teams throughout the feature delivery process.

Frontend Developer / Freelancer

09/2017 – 09/2021

Technologies: HTML, CSS, JavaScript, jQuery, WordPress, Shopify

- Developed websites, landing pages, e-commerce stores, and administration panels using HTML, CSS, JavaScript, jQuery, WordPress, and Shopify.
- Converted Figma and Photoshop designs into responsive, cross-browser compatible interfaces.
- Customized themes, implemented client-specific functionality, and optimized website performance.
- Worked directly with clients, gathering requirements, estimating work, and delivering complete web solutions.

EDUCATION

Bachelor's Degree, Software Engineering

"KROK" university

2023 – 2027

Associate Degree, Computer Systems and Networks

"KROK" university

2015 – 2019
